Engine Conversion Kit (144.5 Cu. In.)

Beaver Dam, Wis.
U.S.A.

An Engine Conversion Kit (423-2275A1) -- to reduce the piston displacement on 4-cylinder MerCruiser Marine Engines from 153 cu. in. to 144.5 cu. in -- is available for special applications. This conversion kit consists of a special crankshaft, pistons and main bearings.

The Engine Conversion Kit may be ordered directly from the Kiekhaefer Corporation, Parts and Service Division, Beaver Dam, Wisconsin, U.S.A.

Order gasket sets separately under part numbers listed in your MerCruiser Parts Manual.
