MerCruiser Super Speedmaster Units

MERCUISER SUPER SPEEDMASTER UNITS

In Service Bulletin No. 67-1, dated November 11, 1966, we announced the availability of several Super Speedmaster units for MerCruisers. Two of these units were the 1633-2718A2 and A3, right and left hand rotation (respectively). Now, the entire MerCruiser II drive unit is available equipped

with these Super Speedmaster units as a package (less propeller). (Figure on left) The package will be equipped with the Heavy Duty Power Trim (B-39881A2), which was listed in the same Service Bulletin. The Heavy Duty Power Trim permits easy trimming of the boat for fast planing of heavily loaded boats and to maintain an even "plane" in rough water when operating at cruising speed.

This MerCruiser II Super Speedmaster package is available in both right and left hand rotation for high speed performance applications on boats capable of speeds in excess of 65 MPH.

Stainless steel propellers are selected by the factory for correct pitch and diameter for all applications. Specify all boat and engine data when ordering.

All applications of MerCruiser Super Speedmaster packages must be approved by the Kiekhaefer Mercury Engineering Department to assure correct installation and application.

B-1544-3442A5	MerCruiser II Super Speedmaster Drive Unit Package (Right Hand)	\$ 995.00 Net U.S.
B-1544-3442A6	MerCruiser II Super Speedmaster Drive Unit Package (Left Hand)	995.00 Net U.S.
