

**OFFICIAL NOTIFICATION under FEDERAL BOAT SAFETY ACT**

Inadequate support of the metal fuel line on some MCM 120 and 140 Engines may result in a fatigue failure of the fuel line adaptor fitting or fuel line at the fuel pump outlet or carburetor inlet. (Figures 1 and 2) If this should occur, fuel will leak into the engine compartment and cause a fire hazard.

Figure 1. Fuel Pump Outlet

→  
Figure 2. Carburetor Inlet

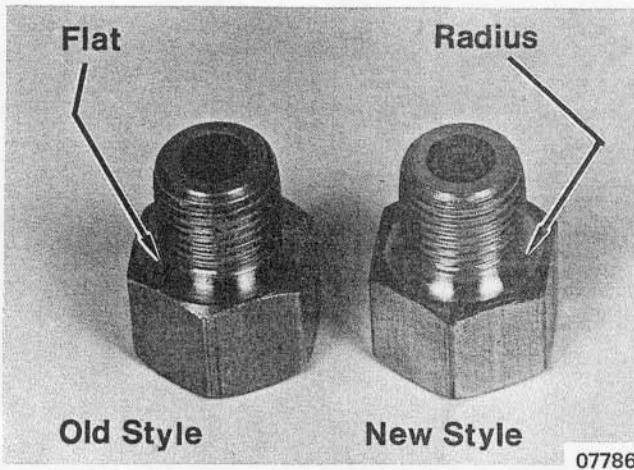

To prevent this condition, install Fuel Line Support Kit B-65406A1 on all of the following MCM 120 and 140 Engines:

- A. MCM 120 Engines, Serial No. 3461708 thru 3507079
- B. MCM 140 Engines, Serial No. 3462608 thru 3464411

(OVER)

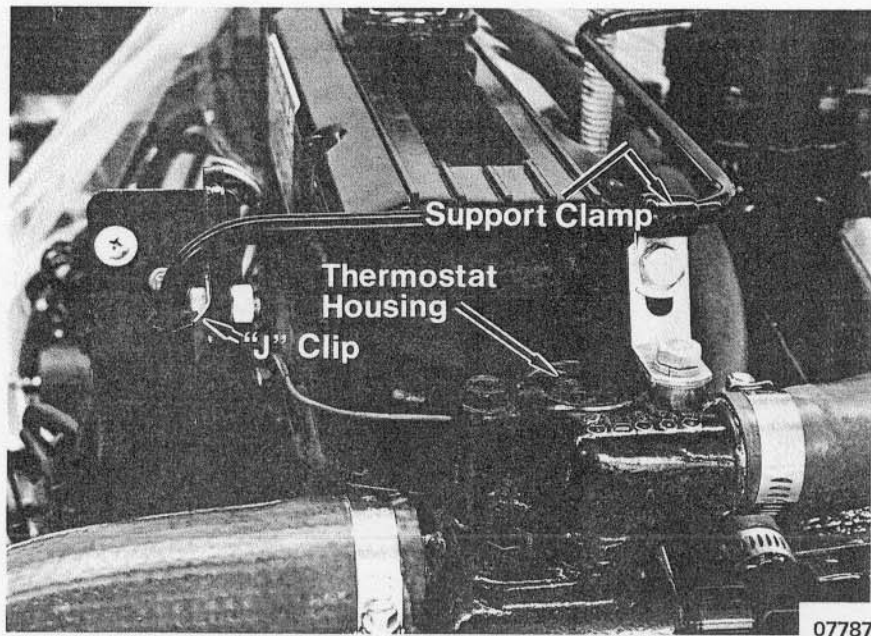

The kit contains new fuel line adaptors (Figure 3) and fuel line support brackets.

*NOTE: If fuel line is damaged, replace with new fuel line.*

Figure 4. Thermostat Housing Support Clamp  
↓

Engines, which are equipped with support kit, can be identified by support clamp installed on thermostat housing and timing gear cover. (Figures 1 and 4)

**CAUTION:** Be sure to follow "Support Kit Installation Instructions" carefully and check entire fuel system for leaks after installation has been completed.

Part No.	Description
B-65406A1	Fuel Line Support Kit
C-32-64295A1	Fuel Line (MCM 120)
C-32-64296A1	Fuel Line (MCM 140)

Labor Rate Allowance: 0.4 Hr.
