

**MERCURISER and MERCURY OUTBOARD  
LOWER UNIT LUBRICANT RECOMMENDATIONS**

**WARNING!**

Only QUICKSILVER SUPER-DUTY GEAR LUBRICANT is recommended for Mercury Outboard and MerCruiser Stern Drive units. DO NOT USE ANY OTHER lower unit lubricant.

Some servicing dealers, who service Mercury Outboards and MerCruiser Stern Drives, have used OMC and other competitive lower unit lubricants in Mercury products. Recent tests have shown that some batches of OMC Type C lubricant give unsatisfactory lubrication in Mercury and MerCruiser units.

For the protection of our mutual customers, we wish to advise all dealers that drive unit damage from use of other than the recommended QUICKSILVER SUPER-DUTY GEAR LUBRICANT will not be covered by warranty.
