Leak in QSD 4.2L High-Pressure Fuel Line

Models Affected

Model	Serial Number Range
QSD 4.2L 270 hp	88401254 and below, except for 88401228 and 88401237
QSD 4.2L 320 hp	88407335 and below
QSD 4.2L 350 hp	88417305 and below, except for 88417243

Situation

The high-pressure fuel injector supply lines on some QSD 4.2L engines have experienced fatigue cracking at the formed end under the sleeve nut. These fatigue cracks may result in a dripping fuel leak and have not resulted in a spray.

- a - Old style with loose sleeve
- b - New style with fixed sleeve

Correction

Cummins MerCruiser Diesel (CMD) has released new high-pressure fuel line kits to correct this situation. These lines are sold in sets. If one fuel line is leaking, replace the complete set. Replacement fuel line kits are marked with a green dot on the packaging and have a date code of November 30, 2009 or later.

- a - Date code
- b - Green dot

43419

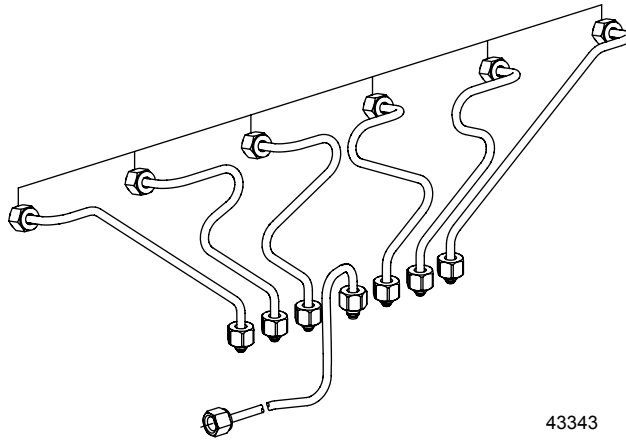

For fuel line replacement procedures, refer to **SM #47 CMD QSD 2.8L & 4.2L Engines**.

CMD has removed all suspect parts inventory from stock worldwide.

IMPORTANT: Do not use a replacement fuel line kit not marked with a green dot on the packaging or has a date code earlier than November 30, 2009.
