## 200 XS OptiMax Service Manual Wiring Correction

### Models Affected

None. Correction is for the colored wiring diagram in the 200 XS Service Manual.

### Situation

A correction to the 200 XS OptiMax Service Manual (90-840421) colored wiring diagram foldout on page 8-3 is needed to correctly depict the wire colors for the Main Power Relay. The Yel/Red wire shown coming from the harness connector should be Yel/Pur.

The black and white wiring diagram on page 2D-19 has the correct wire identification for the main power relay (item #17) and does not require a sticker.

### Correction

Place the sticker provided directly above callout number 26 for the Main Power Relay located at the top of the colored wiring diagram.
