## LIFTING EYE FOR 1996 FORCE OUTBOARD AND MERCURY MARINE SPORT JET MODELS

1996 Force outboards and Mercury Marine Sport Jet models will have a new electrical and ignition system. This change includes a new flywheel design. Because of this, a new lifting eye will be necessary. The major difference is the lifting eye threads in the flywheel rather than on the crankshaft. The part number for the new lifting eye is **91-90455** and can be ordered through the normal parts ordering procedure.
