Zero Effort DTS Control Replacement

Models Covered

DTS Zero Effort Controls with throttle lever detent.

Scope

Worldwide

Situation

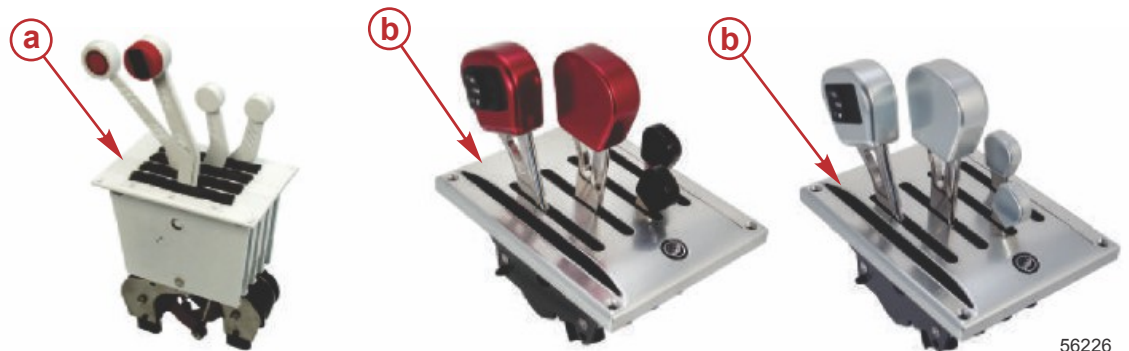

With a few exceptions, Mercury Racing no longer manufactures complete assemblies of the previous model DTS Zero Effort control. Previous models are identified by their color (Black or White), with the throttle lever having a series of detent positions. Individual service replacement parts are available through the electronic parts catalog. Refer to the control listing to see which controls are still active for manufacture.

Correction

The current control cover is smaller than the previous control cover. If you choose to replace the previous control with a current control; the previous control opening will have to be reworked to cover the exposed area of the opening. There is nothing available from Mercury to rework the current control opening.

Ordering Replacement Zero Effort Controls

Orders for the previous controls will be filled until the inventories are depleted, then they will no longer be available. To order a current model, locate the style you want to replace and order the **New Color** or **New Clear** part number directly to the right of the old part number.

- a - Previous style
- b - Current style

Control Listing

Use the following table to obtain the previous or current part numbers for the DTS controls.
