## NON-CURRENT ACCESSORIES GUIDES ON MICRO-FICHE

Your current accessory guide covers accessories and products for current production models.

This bulletin is to inform you that all **NON-CURRENT** accessory guides are available on micro-fiche.

In many instances this may be the only resource to locate accessories and add-on kits for non-current product. These micro-fiche will show the exact part number of the kit used during a specific model year. The cards are a necessary resource to avoid costly application errors. The *accessory guide micro-fiche set* includes accessory guides dated 1967 through current product.

Order part number: **90-804065** (non-current accessory guide micro-fiche set)
