A. CRANKCASE BREATHER KIT

Models

HINO DIESELS: WO4C-TI (210HP), WO6D-TI (250HP)

Kit Usage

A crankcase breather kit is available for the above model engines. The kit consists of a precipitator which separates oil from the crankcase ventilator. The separated oil returns to the block via an oil return line. The ventilator hose is then routed to the turbo air inlet for recirculation into the engine.

Kit Part Number

806465A 1 Hino breather kit
